

Some Interesting Statistics

Data collected from two largest distributors on the island estimate that they import 180,000 polystyrene foam containers and 600,000 plastic bags every month.

75% of respondents to our 'deep data dive' for PlasticFreeSXM support banning single-use plastics and polystyrene foam products.

SAINT MARTIN

39% of our survey respondents use plastic bottles daily.

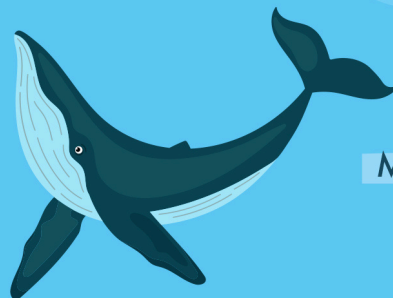

SINT MAARTEN

70% of our survey respondent's don't use reusable bags because 'they forget them'. #lame

Philipsburg

We estimate that on St. Martin, we create 10,000 tonnes of plastic waste annually. This is the weight of about 85 Blue Whales!

Microplastics and other chemicals from plastic waste have been detected in water and the food we consume. This is a serious health concern.
